PROFILE

Lifelong lover of technology and engineering who's passionate about problem solving. Experienced full-stack developer specializing in TypeScript, Node.js, and React for high-value web applications. Equally experienced working and leading collaborative teams following Agile methodologies as I am being a self-directed solo developer. Consistently building great solutions on time and under budget with high-quality code. Let's solve problems and build something great together.

PROFESSIONAL EXPERIENCE

Founder, MatterHive

2024 - 2025 | München, DE

Founded, built, and launched an online platform for lawyers to conduct pre-contract enquiries for conveyancing transactions in the UK and ZA.

Built with Typescript, NestJS, NextJS, Docker, postgres, turborepo, terraform, OpenFGA, RabbitMQ.

Fullstack Developer, Acrontum GmbH

2021 - 2025 | München, DE

Worked on a variety of client and internal projects from small internal POCs through to being the tech lead on a new product built for a large automotive company working directly with the client and other stakeholder suppliers to design and build their ideal solution.

Collaboratively worked with developers, designers, QA, DevOps, and PMs using agile methodologies and software development best practices.

Primarily building microservices and modular monoliths using NodeJS, Angular, Postgres, Docker, and AWS.

Senior Consulting Engineer, Keyence UK

2015 - 2020 | Liverpool, UK

Working with sales engineers and their clients to solve advanced technical factory automation problems and provide full solutions to their applications. Writing POC software to implement solutions using varied hardware, software, and languages.

Building and launching various products

I've been concepting, building, and launched various full stack websites and products either solo or in collaboration with other developers with a variety of tools and languages for 9 years.

These include a AI powered TTS journal, an online video training platform with aws based video upload encoding and streaming, a tender marketplace for UK Machine Builders, a stripe based recurring payment platform for service providers, and a fun inspirational holiday flight aggregator and destination research tool.

EDUCATION

Mechanical

Engineering - BEng, University of Liverpool
2012
Liverpool, UK

TECHNOLOGIES

Typescript
NodeJS
NestJS / Express
NextJS / React
